Personal Profile

A motivated and analytical MSc Sports Business and Management graduate from the University of Liverpool with a strong background in economics and data analysis. Passionate about combining strategic insight with quantitative research to support growth and innovation in the sports industry. Skilled in market analysis, data modelling, and project leadership, with hands-on experience in sports event management through a university-led NFL hosting simulation. Seeking to contribute to a dynamic graduate program in sports business where I can apply my analytical mindset, teamwork, and enthusiasm for the global sports market.

Education

MSc Sports Business and Management
University of Liverpool | 2024–2025 Graduated with a Merit

- Focus areas: Sports Marketing, Event Management, Business Analytics, and Global Sports Strategy
- Final Project: Exploring how a lack of competitive balance and rivalry affects dominant football teams' commercial performance.
- Group project: Led data analysis for an NFL event simulation project, developing a regression model to predict UK viewership and inform event location strategy outside London.

BA (Hons) Economics and History
University of Liverpool | 2021–2024

- Graduated with 2:1 with Honours
- Key modules: Microeconomics, Macroeconomics, Sports Economics, World-wide History
- Final Project: A review of economist Walt Rostow, and his involvement in Operation Rolling Thunder.

Key Skills

- Data Analysis & Modelling: Experienced in Excel, data analysis and modelling.
- Strategic Thinking: Able to translate data insights into actionable recommendations for business strategies.
- Research & Market Analysis: Strong ability to analyse trends and evaluate commercial opportunities within markets.
- Leadership & Teamwork: Led group project components and coordinated cross-functional collaboration in high pressure settings.

- Communication: Skilled in presenting findings clearly to both technical and non-technical audiences.
- Organisation & Time Management: Consistent record of meeting deadlines on all academic projects.

Projects & Experience

NFL UK Event Simulation Project
University of Liverpool | 2025

- Collaborated in a team of six to design a proposal for hosting an NFL game outside London.
- Led the data analysis segment, building a regression model to forecast potential UK viewership based on team matchups and demographics.
- Presented findings to an academic panel, demonstrating the commercial feasibility of selected host cities.
- Helped with and gained insight into event logistics, sponsorship alignment, and sports marketing strategy.

Independent Research Projects

- Produced a report for a technology-based and ethical activation between Manchester United and Adidas that centred around using AI to reduce the environmental impact of fast-fashion whilst giving fans an enjoyable, immersive experience.
- Conducted multiple economics-based research assignments involving data collection, hypothesis testing, and econometric analysis on football leagues such as the Saudi Pro League and clubs such as Celtic FC and Huddersfield Town.
- Developed strong proficiency in Excel-based data modelling and quantitative research methodologies.
